Profile

I am a driven and dedicated Computer Engineering student in the last semester of completing my college career. With a solid foundation in computer science principles and a passion for technology

Education

Universidad Nacional de Costa Rica. Computer engineering (Bachelors)
Currently my overall average GPA is 8.5; in the last 2 years is 9.0 will be finishing my bachelor's degree in November.

2018 – present
Alajuela, Costa Rica

Universidad Nacional de Costa Rica. Computer engineering (Diploma)
Graduated with a diploma called diplomado en programación de aplicaciones informáticas.

2018 – 2022
Alajuela, Costa Rica

Professional   Experience

Owner and current manager, *BoloScooters Importaciones*
Head of sales and customer service; website designer, social media advertising and management.

2021 – present
Alajuela, Costa Rica

Web developer, *CTP Bolivar*
Designed and implemented a web application that was compatible with multiple browsers and devices. Our team was using SCRUM and the tools we used to make the web application were Laravel as back-end, SQL for the database and ReactJs as front-end. My involvement was mainly in creating the Rest API with all the methods and requirements, creating the database, and testing the API with Postman

02/2021 – 06/2023

In charge of outside activities, *Ober Gatlinburg*
Greeted customers in a friendly and professional manner, made sure everything was going as smoothly as possible.

2019 – 2020
Tennessee,
United States

Skills

Python development
Experience using python with OOP, also using modules and frameworks like Django and Django Rest Framework.

JavaScript Development
Experience developing web applications using vanilla JavaScript with HTML, CSC

Backend development
Experience creating REST APIs with frameworks like: Django Rest Framework, Laravel and Spring Boot. Also implementing security with JWT.

API testing
Experience testing API's using Postman.

Experience using databases.
Knowledge of SQL Databases like MySQL and Postgresql And none SQL databases as MongoDB

Fast learner
Learning new stuff isn't a big problem, due to my hard work and motivation.

Java Development
Experience developing web and desktop applications.

Frontend Development
Experience developing frontend using advanced technologies such as React but also basic technologies as HTML, CSS, JavaScript, and BootStrap.

Git/GitHub
experience using the git/github workflow.

Teamwork
I can work good with a team and adapt to their workflow, also I think communication is key when working with a team.

Customer service
Highly skilled on handling customers of any kind
